

One of the World's Largest Healthcare Companies

Challenge:

Help support best-in-class software development while maintaining a high level of structure and control for compliance. Foster innovation and increase velocity without limiting the tools practitioners use to optimize their contributions.

Solution:

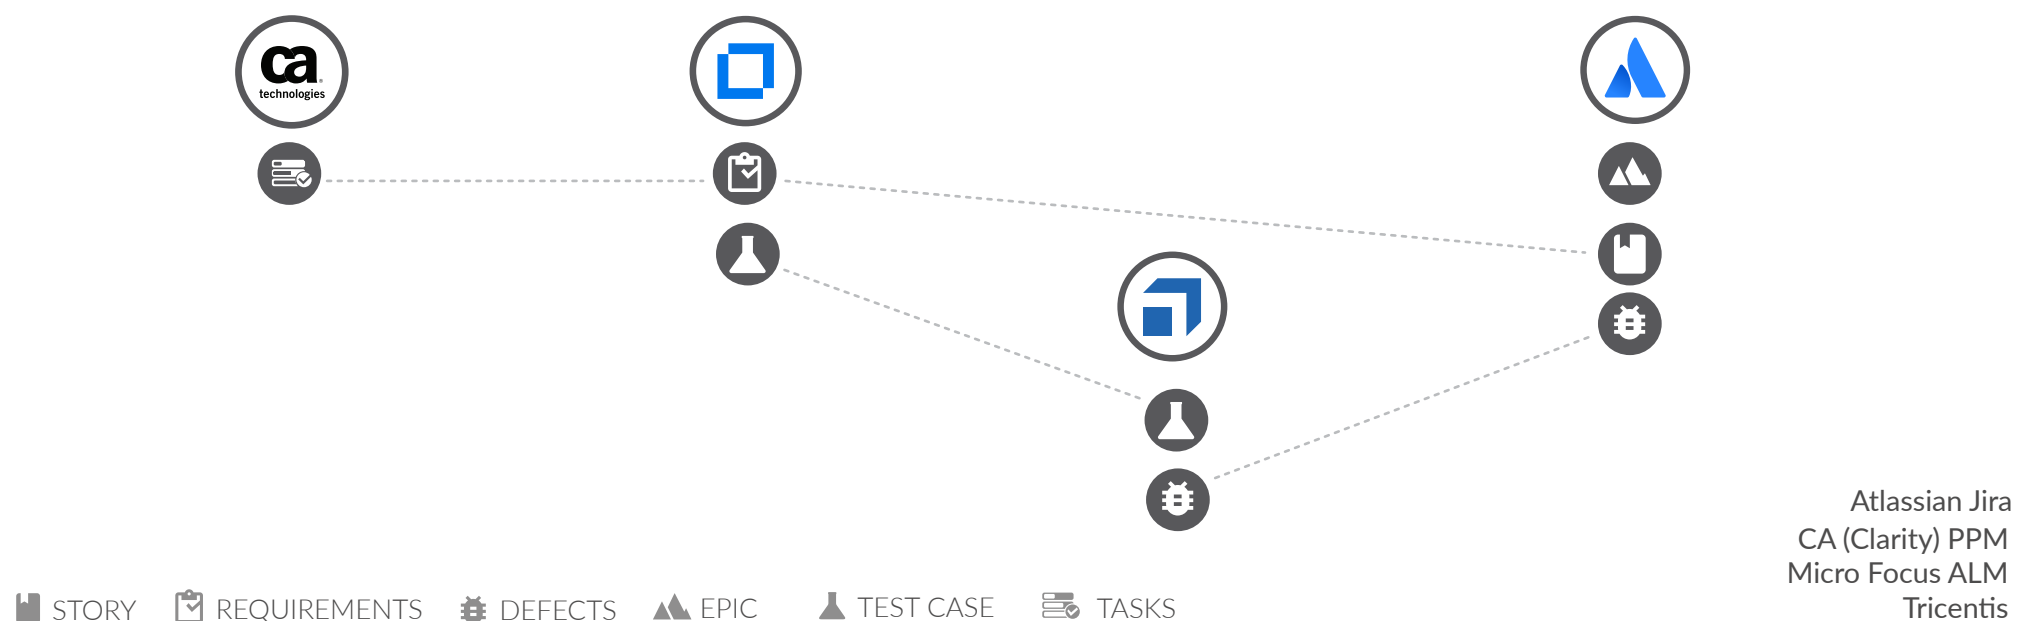

Integrate PPM, Agile planning, development and test into one connected value stream. Improve status reporting and project timelines within and across software delivery team. Eliminate manual steps and remove communication barriers. Enable everyone to have access to current project information.

Results:

Better status reporting. Improved traceability. True collaboration. Natural workflow and communication (without manual effort).

Value Stream Integrations

Enhanced productivity. Increased velocity. Competitive advantage.
