

One of The Largest US Insurance Companies

Challenge:

A major IT upgrade. Support a large and diverse set of stakeholders with quality software delivered as quickly as possible. Launch and maintain a Testing Center of Excellence. Create a single source of truth across software delivery disciplines.

Solution:

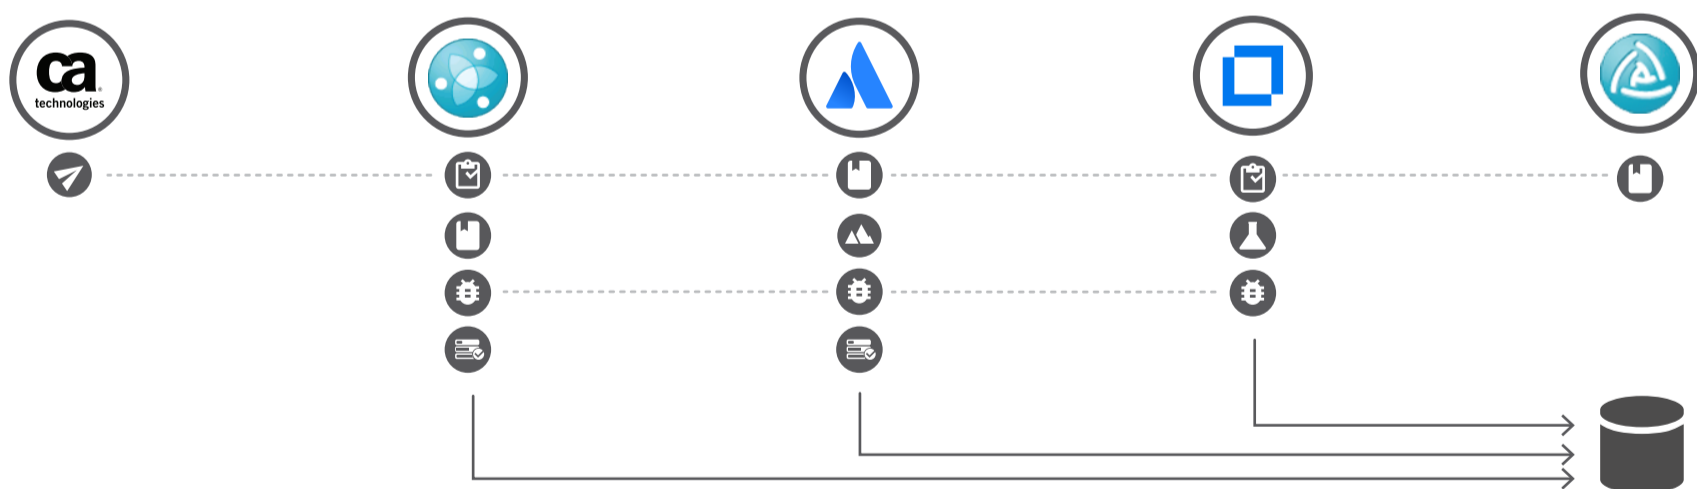

Integrate diverse systems-developer tools, requirements, project management, QA tools and help desk. Enable easy, automated collaboration while practitioners work in best-of-breed tools of choice. Provide a central source for application quality and other software delivery process information.

Results:

Improved productivity. Improved visibility for governance. Improved quality and velocity. Improved collaboration—team members have the same information at the same time.
