One of The Largest Specialized Hospital Providers

**Challenge:**
Rapidly growing company in a highly regulated industry. Information Systems (IS) supports tens of thousands of stakeholders and their work is directly tied to quality patient care. Need for accurate reporting. Must anticipate the need for IS resources on an ongoing basis, manage a wide variety of off-the-shelf and custom tools while paying strict attention to data security and privacy. Need to have a single source of truth for reporting.

**Solution:**
Connect the software delivery value stream to create a manageable and adaptable IT infrastructure. Eliminate duplicate entry and identify bottlenecks. Provide visibility into processes and data that can be used for continual improvement.

**Results:**

Value Stream Integrations

---

**Reduced cost. Time savings.**

Tasktop is an easy to use, scalable and reliable software delivery tools integration infrastructure. Learn more at www.tasktop.com
